

ELECTRONIC MUSIK

We are a label which specialises in experimental and free improvised music, particularly using electronics and guitars. Run by musicians, we are non profit making which enables us to release exactly what we want and not to charge high prices.

The improvising electronics outfit "LDT" was the original driving force behind this when they realised that the potential of the Internet was huge for musicians and artists such as themselves who would attract no interest from commercial labels. Hence our material is available only through the Internet from this site or at live events.

Also available, again directly from us, is music from other artists we admire such as Phroq, Pruriant, Marc McNulty and John Kannenberg.
